

What is claimed is:

1. 1. A DIY-assembled easy digital camera, comprising:
 - 2 a digital camera module having a lens, shutter button, electric components, and output interface, all disposed on a circuit board; and
 - 4 a flush base plate of package foldable for building box, having a fixing base glued thereon, the fixing base further comprising a battery seat for fitting batteries and a circuit board seat for laying the camera module, in which a fixing hole for setting a viewfinder is perforated in a position where the fixing base is glued to the base plate of package; and an opening is disposed in the base plate of package at a location corresponding to the lens and the viewfinder such that the lens and the viewfinder can be exposed to the air through the opening for picture-taking operation.
 - 10, 2. The easy digital camera according to claim 1, in which a buckling groove is formed in the circuit board seat for retaining the circuit board to lay the digital camera module.
 - 11, 3. The easy digital camera according to claim 1, in which the base plate of package is a polyvinyl chloride (PVC) lamina.
 1. 4. A DIY-assembled easy digital camera, comprising:
 - 2 a digital camera module having a lens, shutter button, electric components, and output interface, all disposed on a circuit board; and
 - 4 a casing built with a base plate of package, having a fixing base glued thereon, the fixing base further comprising a battery seat for fitting batteries and a circuit board seat for laying the camera module, in which a fixing hole for setting a viewfinder is perforated in a position where the fixing base is glued to the base plate of package; and an opening is disposed in the base plate of

9 package at a location corresponding to the lens and the viewfinder such that the
10 lens and the viewfinder can be exposed to the air through the opening for
11 picture-taking operation.

1 5. The easy digital camera according to claim 4, in which a buckling groove is
2 formed in the circuit board seat for retaining the circuit board to lay the digital
3 camera module.

1 6. The easy digital camera according to claim 4, in which the base plate of package
2 is a polyvinyl chloride (PVC) lamina.
